1 Build and prune a team

19 Claude Haiku 5.5 agents. Six proposers answer, six critics read all six answers, six refiners read every critique, one aggregator answers.

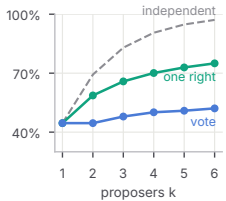

Prune. Keep the first 1, 3 or 6 agents of each middle stage: 27 teams of 4 to 19 calls, each against one Sonnet 5.5 call with thinking off.

2 Score the full team

The full team

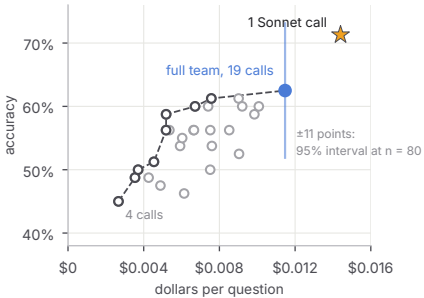

62.5% accuracy	**$0.0115** per question	**19** calls
32 s slowest path	**8.9k** peak context	**1.9** effective proposers

Six proposers act like 1.9

3 27 teams: cost against accuracy

Each dot is one team on the same 80 questions

Dashed: teams no other team beats on both cost and accuracy.
